CERTIFICATION COURSES AVAILABLE

Intended for: ITAM Practitioner, Purchasing/Procurement Personnel, IT & Service Desk Personnel, ITAM Program Managers, IT Project Management Staff, Financial Management Staff, Legal Staff, ITAM Vendor Sales/Support Staff

► CSAM

Certified Software Asset Manager

Instructor-led in classroom - 2 days, 1/2 day certification

Online - 4 days, 5th day certification

Course: \$1,245 USD; Certification: \$250 USD

Total Savings: \$695USD

The Certified Software Asset Manager course assists students with learning the software management side of IT Asset Management. Once successfully completed, students will be able to return to their organizations armed with the latest knowledge available on how to properly manage software assets. A primary topic discussed during this course is the need to remain compliant with software assets and ensuring that current and future regulations are monitored and enforced within your organization. Students also learn various skills such as: managing their organization's software assets, implement and measure the processes that monitor and enforce compliance, and understand how to effectively communicate their findings.

► CHAMP

Certified Hardware Asset Management Professional

Instructor-led in classroom - 2 days, 1/2 day certification

Online - 4 days, 5th day certification

Course: \$1,245 USD; Certification: \$250 USD

Total Savings: \$695USD

The Certified Hardware Asset Management Professional course is a comprehensive class that instructs students on numerous aspects of hardware asset management. Areas such as lifecycle management and disposal management as well as how to effectively handle both of those processes in a cost-savings manner are covered extensively in this course. The knowledge gained from this class can be utilized extensively within any organization and will lead to several benefits such as compliance, cost mitigation, and enhanced performance output. Once students successfully complete this course, they will be prepared to tackle the hardware asset challenges that occur within their organization and provide a focus to IT Hardware Asset Management.

► CITAM

Certified IT Asset Manager

Instructor-led in classroom only

4 1/2 days, 1/2 day certification

Course: \$2,495 USD; Certification : \$250

Total Savings: \$875USD

The main focus of the Certified IT Asset Manager course is to educate ITAM professionals in the proper management of IT assets while aligning their ITAM Program with the organizational business drivers that will promote ROI, reduce risk and increase productivity.

By the end of this course, students will be able to understand and utilize the dependencies, relationships and benefits of the Key Process Areas (KPA) found within an effective IT Asset Management Program: the ability to specify and define the duties and responsibilities necessary to be an effective IT Asset Manager; as well as obtain and display an understanding of the resources and commitment necessary to implement a fully functional IT Asset Management Program.

**Though not required, an understanding of the ITAM operations within one's organization, standard business practices and principles.*
